

## Hay Moisture Tester

Know when to bale or store and how much preservative or drying agent to apply with the Hay Moisture Tester's reliable readings.

DICKY-john's Hay Moisture Testers provide immediate moisture content levels from 8-40% with the push of a button. Our selection includes units that average readings for you, as well as meters to monitor moisture as you bale. For increased precision, all Hay Moisture Testers feature built-in battery and calibration checks and a temperature-stable circuit. Models for Many Applications

DICKY-john's Hay Moisture Tester line includes models with a wide range of features to suit any farmer's needs. From economical to high performance, you'll find the right moisture tester for your operation, whether you're producing hay or cotton. Easy to Use

- In the windrow: simply apply multi-pin prod to the hay, then test
- In bales: just drive the probe across the bale, then test
- In balers: continuous monitoring in balers with a special moisture sensor

Model	Features
-------	----------

### DjF-2000

- Quick, precise readings
- 6-40% moisture range on hay
- User friendly
